COMPANY PROFILE

Integrated supply.
Practical services.
Reliable solutions.

CORPORATE | SERVICES | INDUSTRIAL | CONSTRUCTION

01 / COMPANY

About us

A practical supply and services partner for organizations that value dependable execution.

Business-to-business supplier focused on corporate, operational and industrial requirements.

Everyday workplace essentials, selected technical products and coordinated support services, brought together.

Our approach starts with understanding the requirement, identifying suitable supply options and coordinating delivery.

For specialist scopes, we work with relevant suppliers and service providers to match the requirement with the right expertise.

Our mission & vision

The principles guiding how we serve clients and build long-term relationships.

Our mission

To simplify sourcing and service coordination by providing dependable products, responsive support and practical solutions that help our clients keep their workplaces and operations running.

Our vision

To become a trusted supply and services partner in Egypt, recognized for reliability, flexibility and the ability to connect clients with the right solutions across corporate, industrial and construction needs.

One partner. Multiple requirements.

A coordinated approach that keeps procurement straightforward and focused on client needs.

Requirement-led sourcing

We start with the specification, quantity, timing and intended application.

Supplier coordination

We connect each requirement with suitable suppliers and specialist providers.

Practical execution

Clear communication on quotations, lead times, delivery and service arrangements.

Relationship focus

We aim to build repeat business through responsiveness and dependable follow-through.

Our areas of focus

Four complementary areas designed around common business and operational requirements.

01

Corporate Supplies

Workplace essentials, technology and event support.

- Workplace & pantry
- Events & hospitality
- Technology & equipment
- Additional categories

02

Services

Travel coordination and selected facility maintenance.

- Travel & transportation
- Facility maintenance
- Coordinated delivery

03

Industrial Supplies

Valves, salts, spare parts and technical consumables.

- Valves & flow components
- Salts & process materials
- Mechanical spares
- Sourcing approach

04

General Construction

General works, finishing and construction materials.

- Construction & finishing
- Project support & materials

01

Corporate Supplies

Everyday workplace requirements, sourced and coordinated through one point of contact.

IN THIS SECTION

- Workplace & pantry
- Events & people
- Technology
- Additional categories

Workplace & pantry essentials

Keeping offices, teams and shared spaces supplied with the items they use every day.

Pantry supplies

Tea, coffee, sugar, water, beverages and serving essentials.

Cleaning materials

Detergents, disinfectants, tissue, paper products and janitorial consumables.

Office supplies

Stationery, paper, filing, desk accessories and general office consumables.

Packaging & consumables

Packaging materials and day-to-day workplace consumables.

Furniture & storage

Office furniture, workstations and selected storage solutions.

01 / CORPORATE SUPPLIES

Events, hospitality & people

Support for internal events, employee engagement and corporate hospitality.

- **Catering and refreshments** for meetings, workshops and small corporate events.
- **Event furniture:** chairs, tables, stages, podiums and basic event setup items.

02 / SERVICES

Travel & transportation coordination

Practical coordination for employee movement and business travel requirements.

Employee transportation arrangements and route-based transport coordination.

Driver services for business and operational requirements.

Travel booking coordination for employees, subject to client policy and approvals.

Trip schedules, vehicle requirements and service-provider coordination.

Facility maintenance

Selected hard services to support safe, functional and well-maintained facilities.

- **Plumbing** repairs and routine maintenance.
- **Electrical maintenance** and minor installation works.
- **HVAC and air-conditioning** servicing and maintenance.
- **Firefighting system** inspection and maintenance through qualified specialists.
- **CCTV installation,** troubleshooting and maintenance.

Simple, coordinated service delivery

We keep the scope practical and match specialist work with the appropriate service provider.

STEP 01

Review

Initial requirement review and scope clarification.

STEP 02

Coordinate

Coordination of site visits, quotations and proposed work plans.

STEP 03

Schedule

Scheduling and communication with the client and service provider.

STEP 04

Follow up

Follow-up on completion and client feedback.

Specialist, regulated or safety-critical work is assigned to appropriately qualified providers.

03

Industrial Supplies

Selected products and components for industrial, utilities, oil & gas and maintenance requirements.

IN THIS SECTION

- Valves & fittings
- Salts & process materials
- Mechanical spares
- Sourcing approach

Valves, fittings & flow components

Product sourcing based on application, specification, material and operating conditions.

Industrial valves: gate, globe, ball, butterfly, check and control valves.

Flanges, fittings, gaskets and related pipeline accessories.

Valve spares, repair kits and selected instrumentation accessories.

Technical submittals and datasheet coordination where available.

03 / INDUSTRIAL SUPPLIES

Industrial salts & process materials

Sourcing of selected salts and industrial materials against client specifications.

Industrial salt

For oil & gas and industrial applications, subject to grade and specification.

Bulk & packaged

Bulk and packaged supply options, depending on availability and logistics.

Specification & delivery

Specification, packaging and delivery coordination.

Other materials

Other selected process and maintenance consumables on request.

Mechanical spares & maintenance items

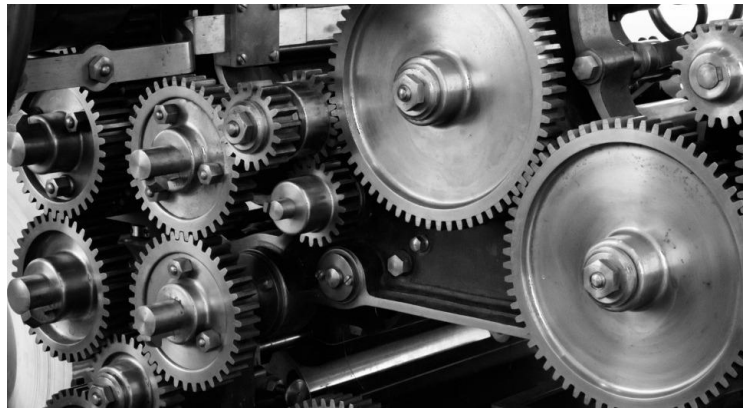
Supporting maintenance teams with commonly required industrial components.

Mechanical spares

Mechanical spare parts and equipment components.

Power transmission

Bearings, belts and power-transmission components.



Pumps & fluid handling

Pumps, pump accessories and selected fluid-handling components.

Bolting & fasteners

Bolting, fasteners and industrial fastening solutions.

Lubricants & chemicals

Lubricants and selected industrial chemicals, subject to application and compliance.

Sourcing approach

A specification-led process designed to reduce mismatches and improve supply clarity.

01

Confirm

Confirm the equipment, application and technical requirements.

02

Identify

Identify suitable manufacturers, distributors or authorized channels where applicable.

03

Compare

Compare technical compliance, commercial terms, lead time and delivery scope.

04

Coordinate

Coordinate documentation and delivery requirements with the client.

04

General Construction

General construction support and selected project-related supply requirements.

IN THIS SECTION

- Construction & finishing
- Project support & materials

04 / GENERAL CONSTRUCTION

Construction & finishing support

A focused range of general works and supply coordination for commercial properties and facilities.

- **General building** and civil works.
- **Interior finishing,** renovation and refurbishment.
- **Minor construction,** repair and maintenance works.
- **Construction materials** supply and delivery coordination.
- **Site coordination** with suitable contractors and specialist trades.

Project support & materials

Support for defined scopes, from requirement clarification through supply coordination.

MATERIALS

- **Construction materials** and consumables.
- **Finishing materials** and selected fit-out items.

COORDINATION

- **Work scope and quantity** clarification.
- **Supplier and contractor** quotation coordination.
- **Delivery scheduling** aligned with site requirements.
